How to Assign Subscriptions Between Sibling Accounts

1. Identify which sibling account has the subscriptions 0:00

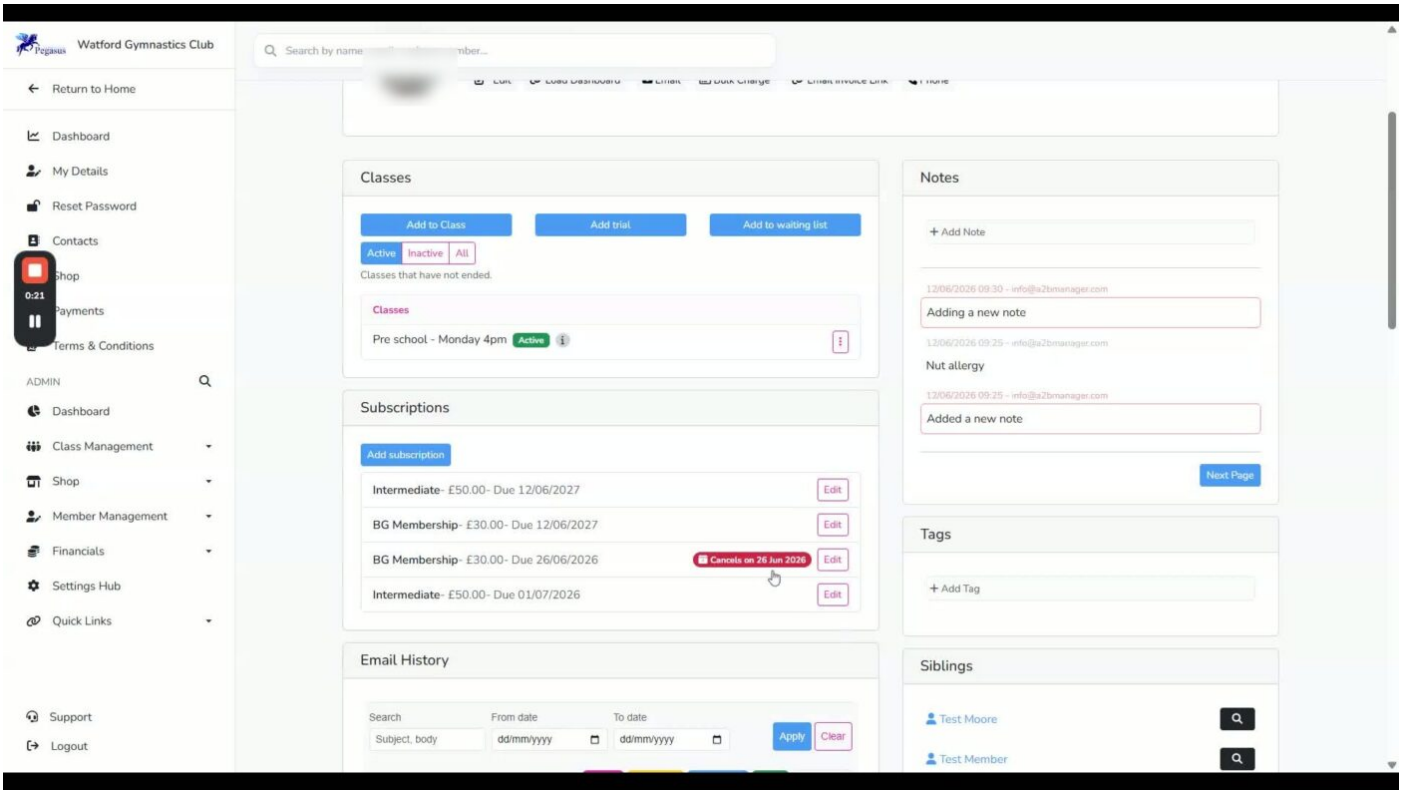

- Look for cases where one sibling profile has **extra subscriptions** and the other sibling profile has **none**.
- First, determine which subscriptions belong to which member before making any changes.

2. Open the subscription list on the account with the extra subscriptions 0:16

- Go to the sibling profile that currently has all of the subscriptions loaded.
- Click **Edit** on that page to begin reassigning subscriptions.

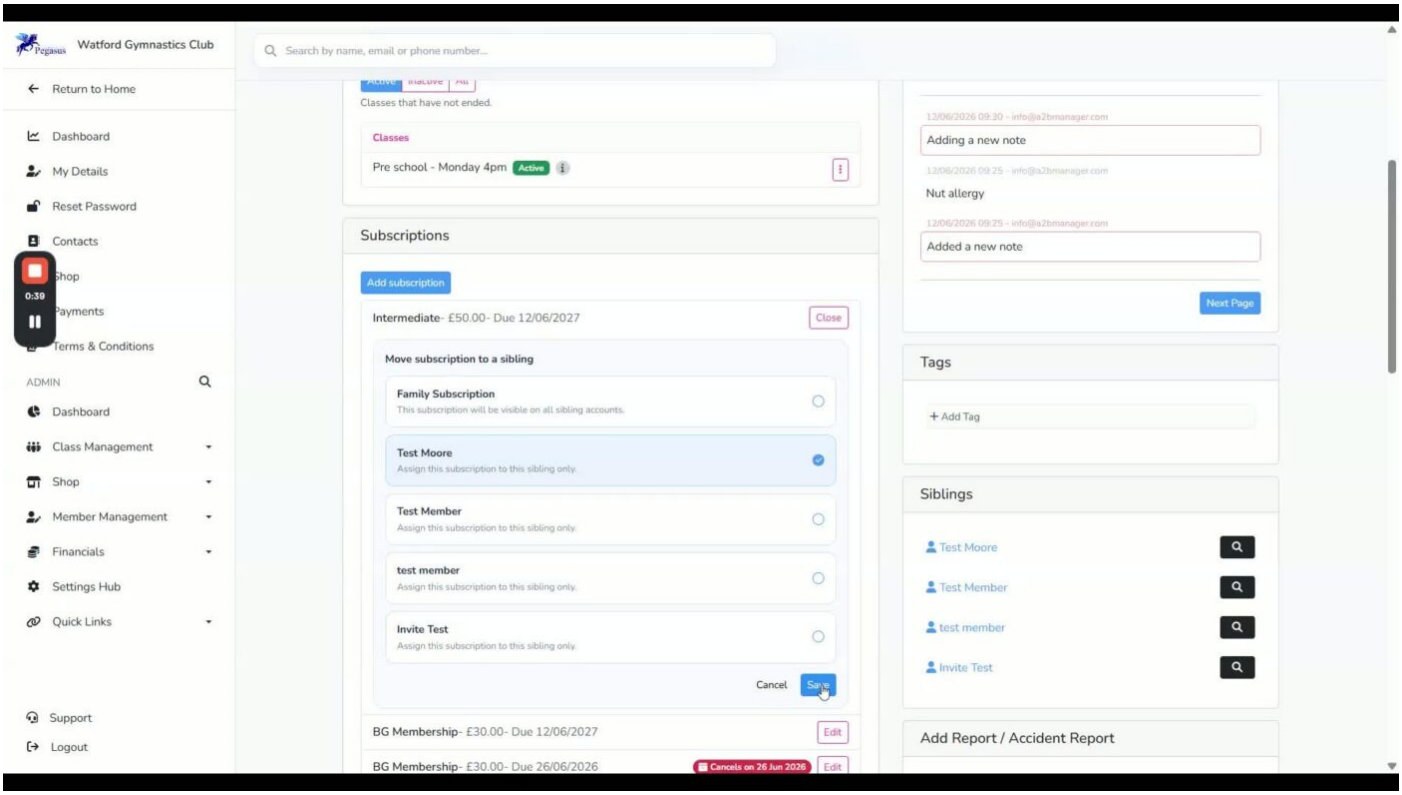

3. Reassign each subscription to the correct sibling 0:22

- For each subscription, select the sibling/member it actually belongs to.

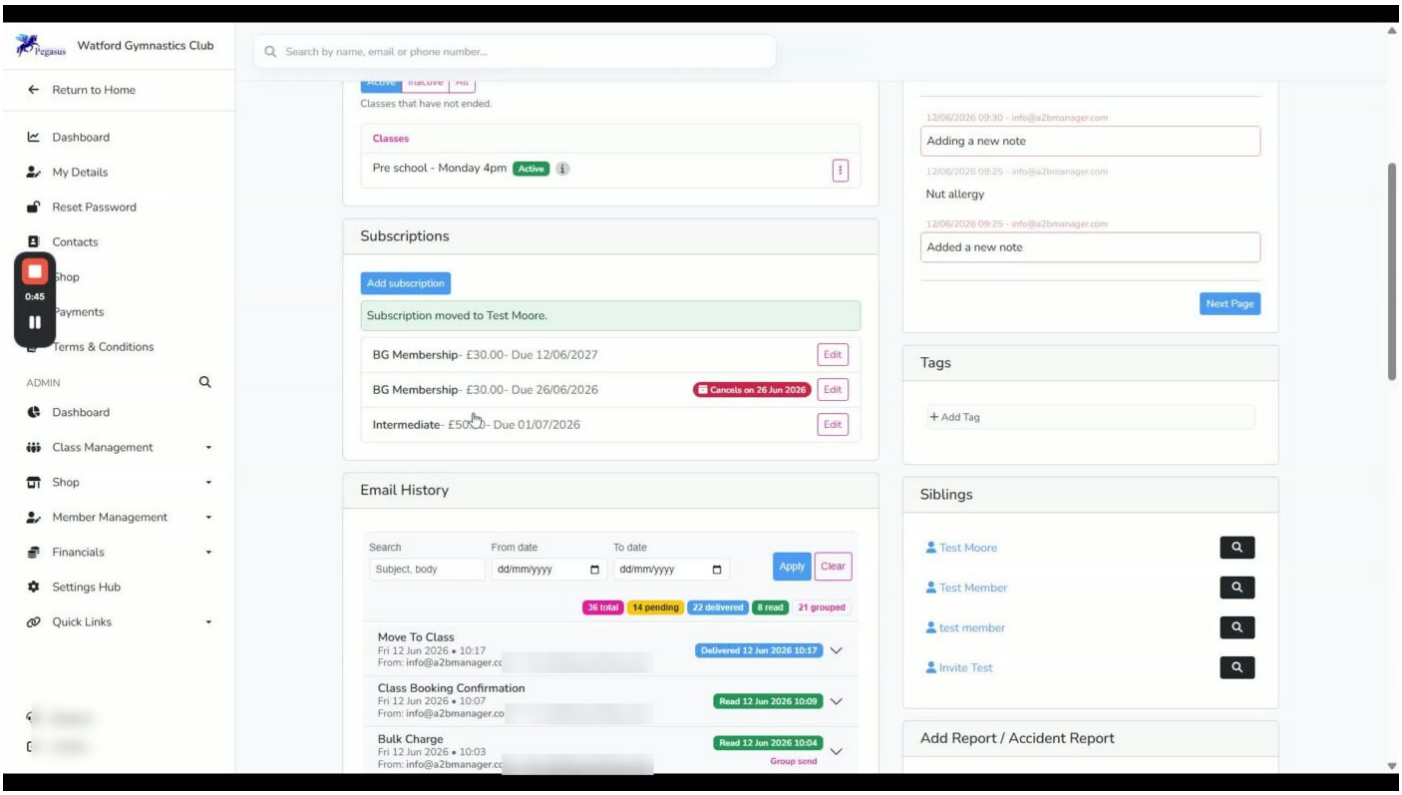

- Make sure you choose the correct sibling account before saving.

4. Save the changes and confirm the subscriptions moved 0:39

- Click **Save** after selecting the correct sibling.
- Confirm that the original account now shows fewer subscriptions.
- Repeat the process for any remaining subscriptions that need to be moved.

5. Verify both sibling profiles are updated correctly 0:44

- Continue moving subscriptions until each sibling has the correct number assigned.
- Check the destination sibling's profile to confirm the subscriptions now appear there.
- In the example, the first sibling ends with fewer subscriptions, and the second sibling's profile now shows the subscriptions that were reassigned.
