How to Share a Booking Link for One Category or Location

You can copy a booking link that only shows one category of classes, such as Recreational, or only one of your venues. Send it to parents, add it to a button on your website, or use it in a social post. When a parent opens it, your booking page only shows the classes in that category or at that location.

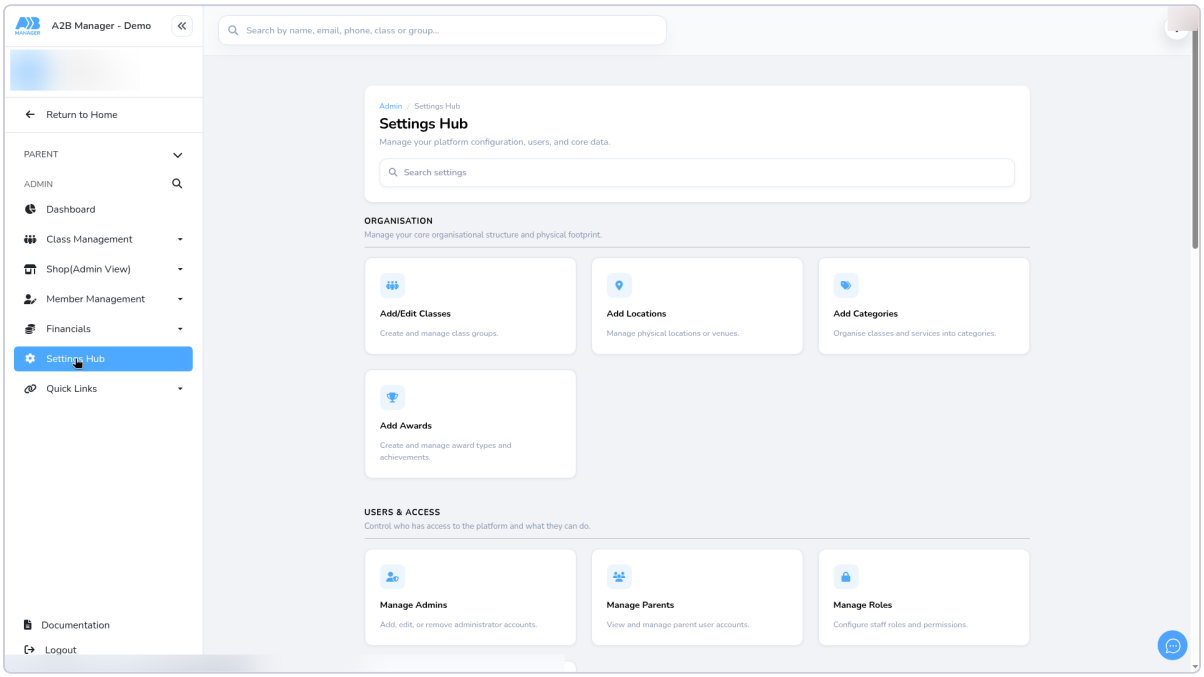

Before you start

- You copy these links in **Settings Hub**, so you need to be signed in as a club admin.
- The links use your club's URL name. If you change the URL name later, these links stop working too. See How to Change Your Club's Booking Link (URL Name).

Sharing a Link for One Category

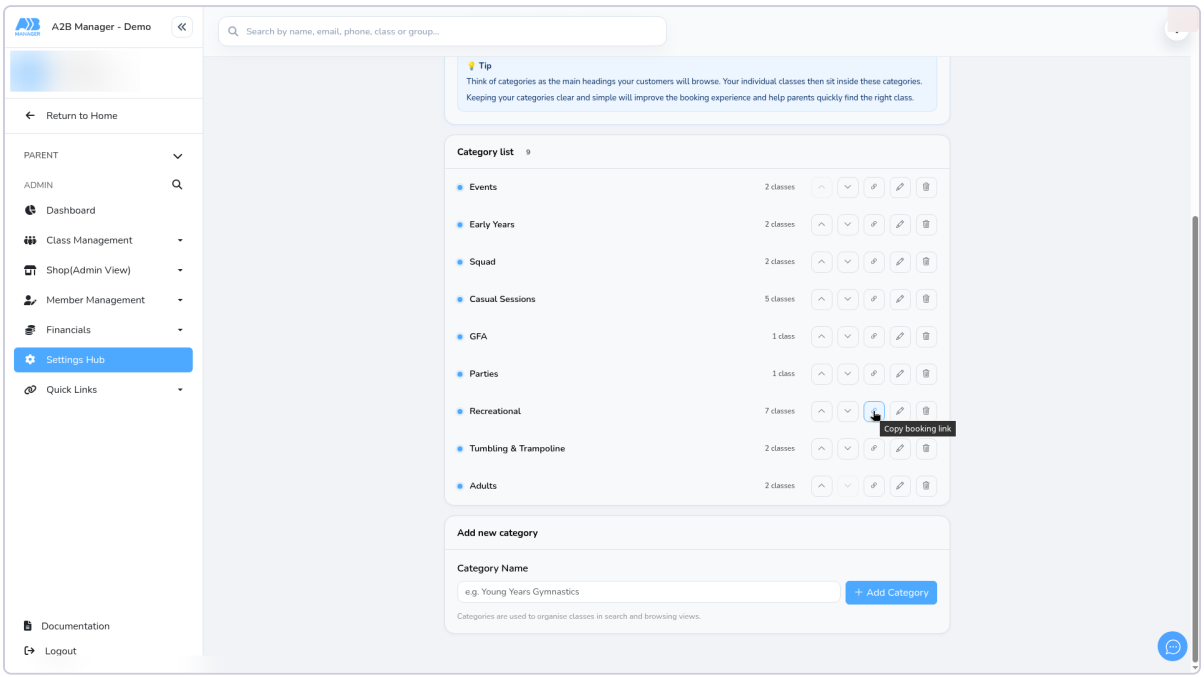

1. Open Add Categories (0:00)

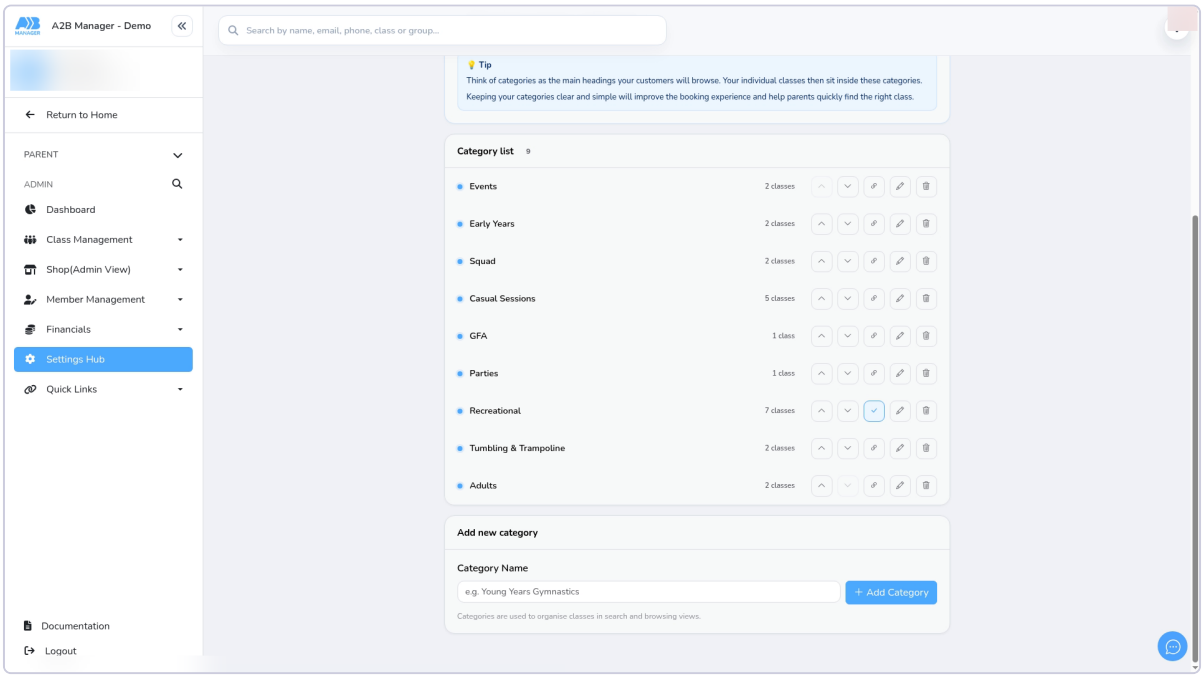

- Go to **Settings Hub**.
- Under **Organisation**, click **Add Categories**. The **Categories** page opens.

2. Copy the category's link (0:10)

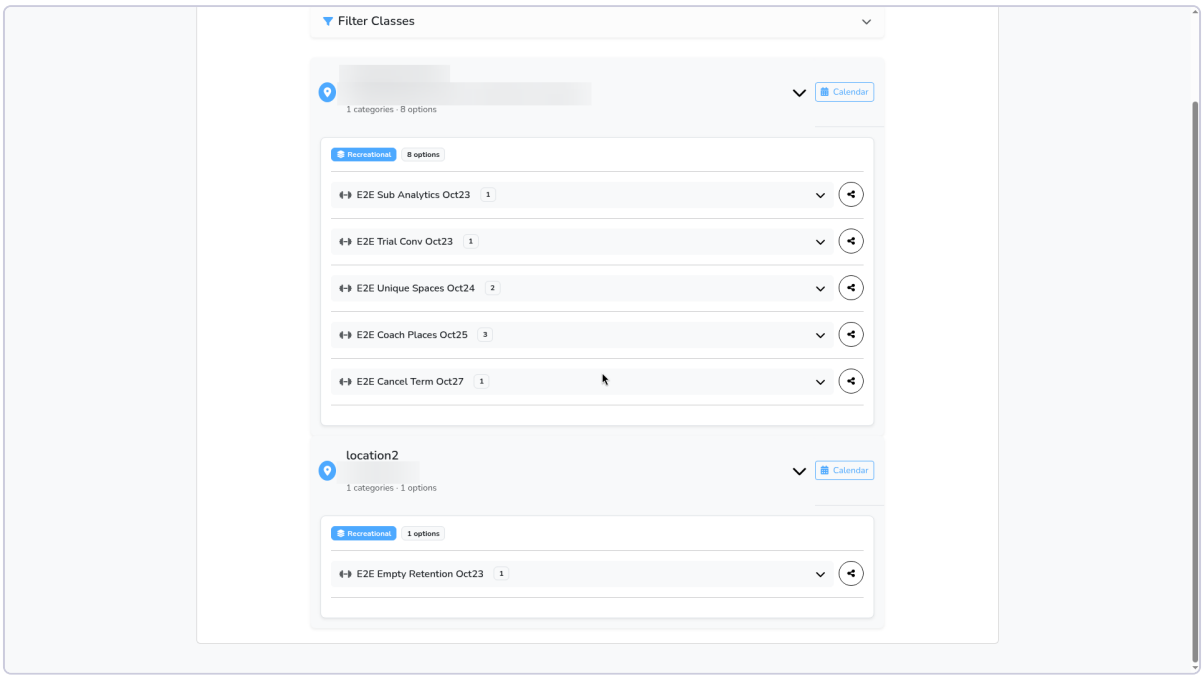

- Find the category you want to share in the **Category list**.
- Click the link icon on its row. Hover over the icon first and you'll see **Copy booking link**.
- The icon briefly turns into a tick to show the link has been copied.

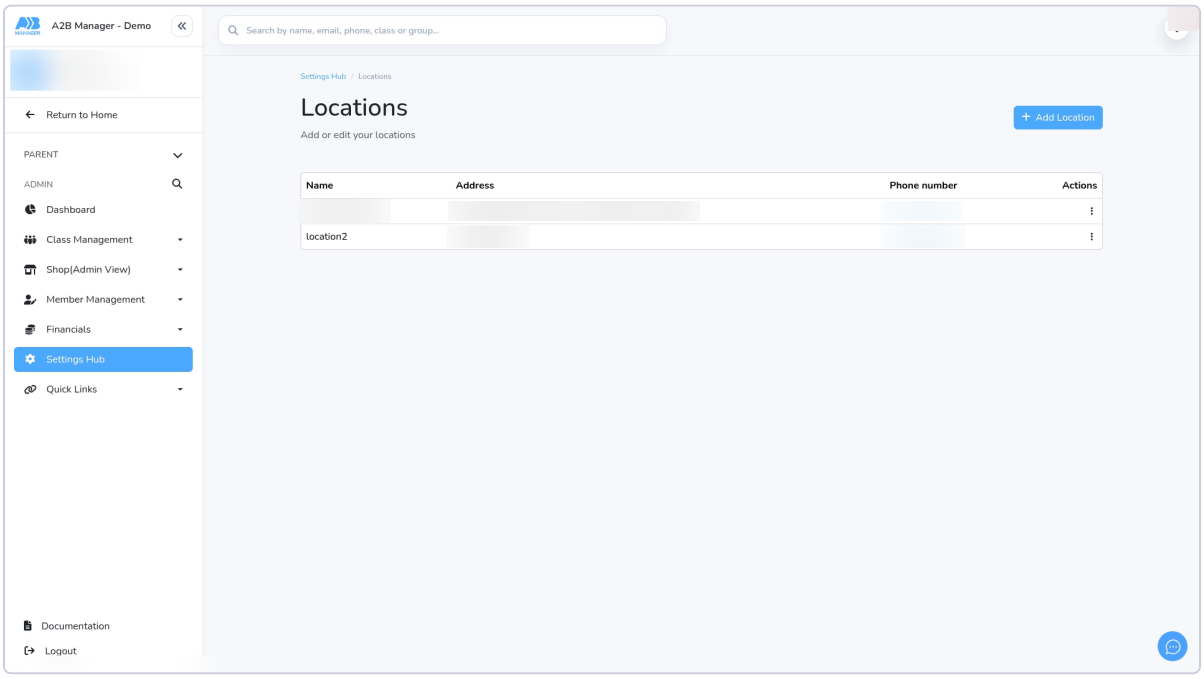

3. What parents see on a category link (0:25)

- Paste the link wherever you need it, for example in an email or on a button on your website.
- When a parent opens it, your booking page only shows the classes in that category.
- Each venue’s list is already open, so parents don’t have to expand anything.

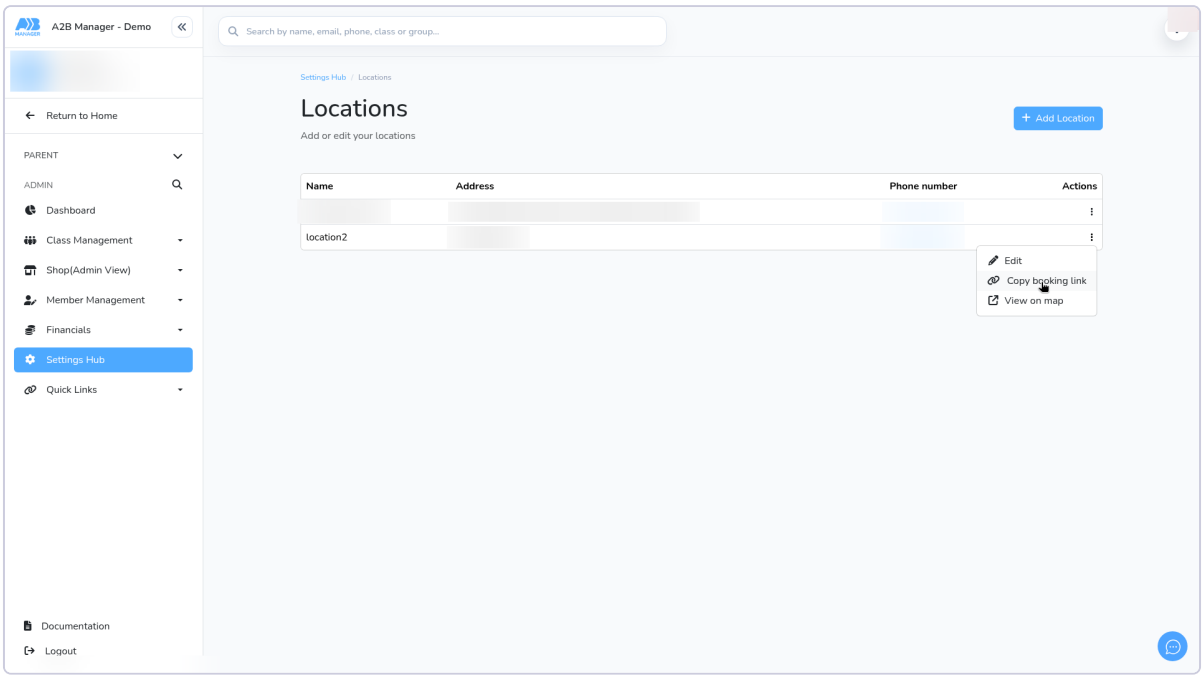

4. Open Add Locations (0:40)

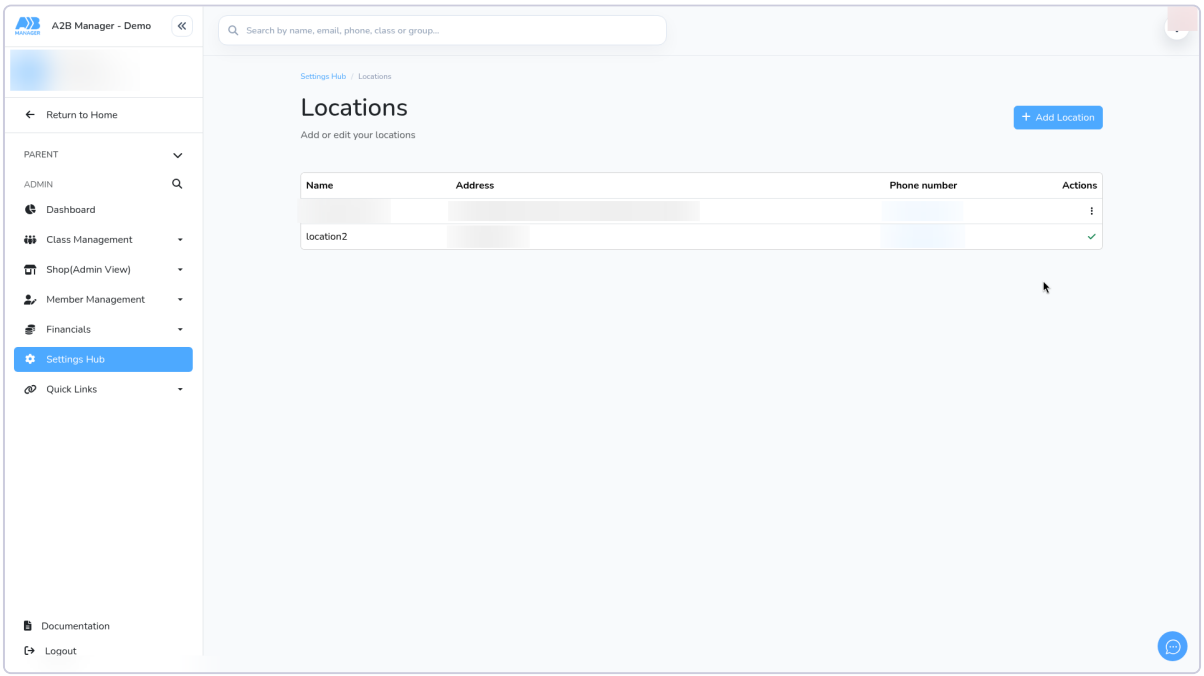

- Go back to **Settings Hub**.
- Under **Organisation**, click **Add Locations**. The **Locations** page opens, listing your venues.

5. Copy the location’s link (0:45)

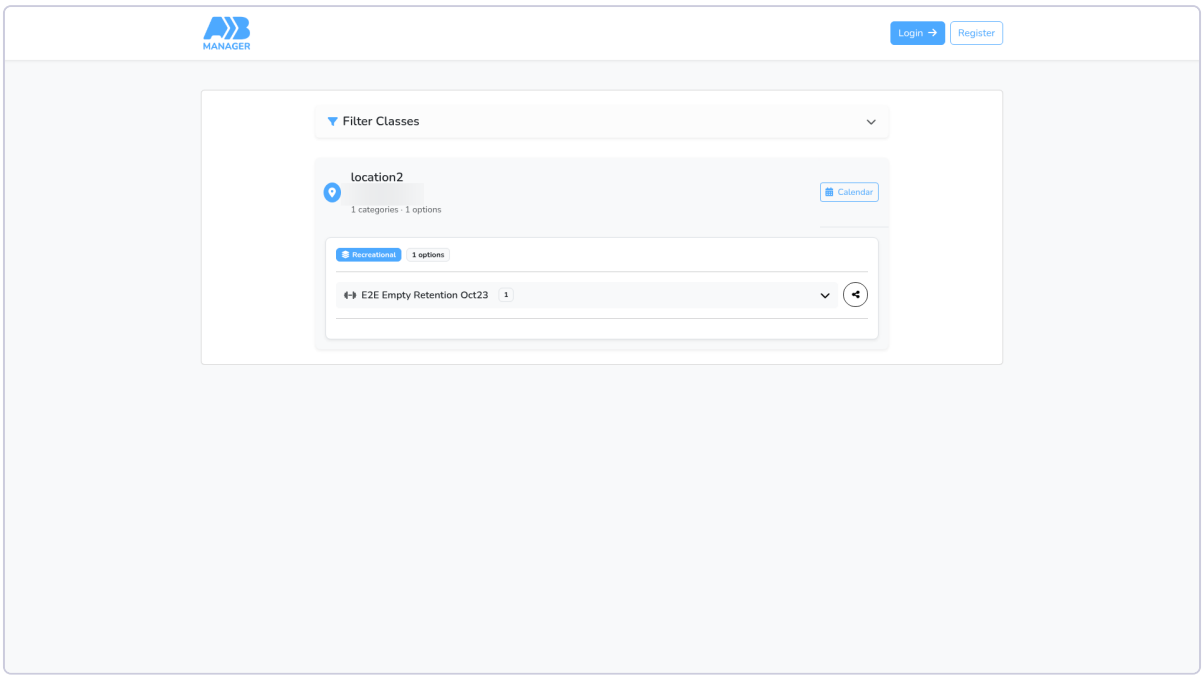

- Click the three dots in the **Actions** column next to the venue you want to share.
- The menu shows **Edit**, **Copy booking link** and **View on map**. Choose **Copy booking link**.
- The three dots briefly change to a green tick to show the link has been copied.

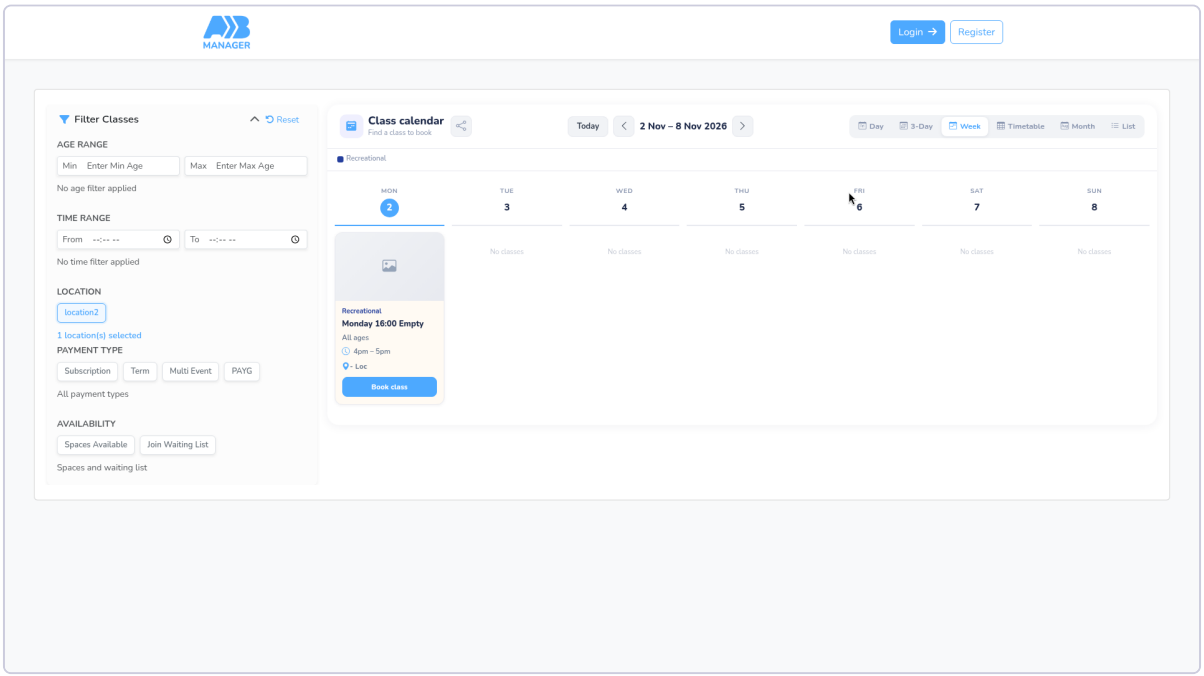

6. What parents see on a location link (1:00)

- When a parent opens the link, your booking page only shows that venue, and its list is already open.
- Classes that have no sessions at that venue are hidden.
- The **Calendar** button shows the same venue too.

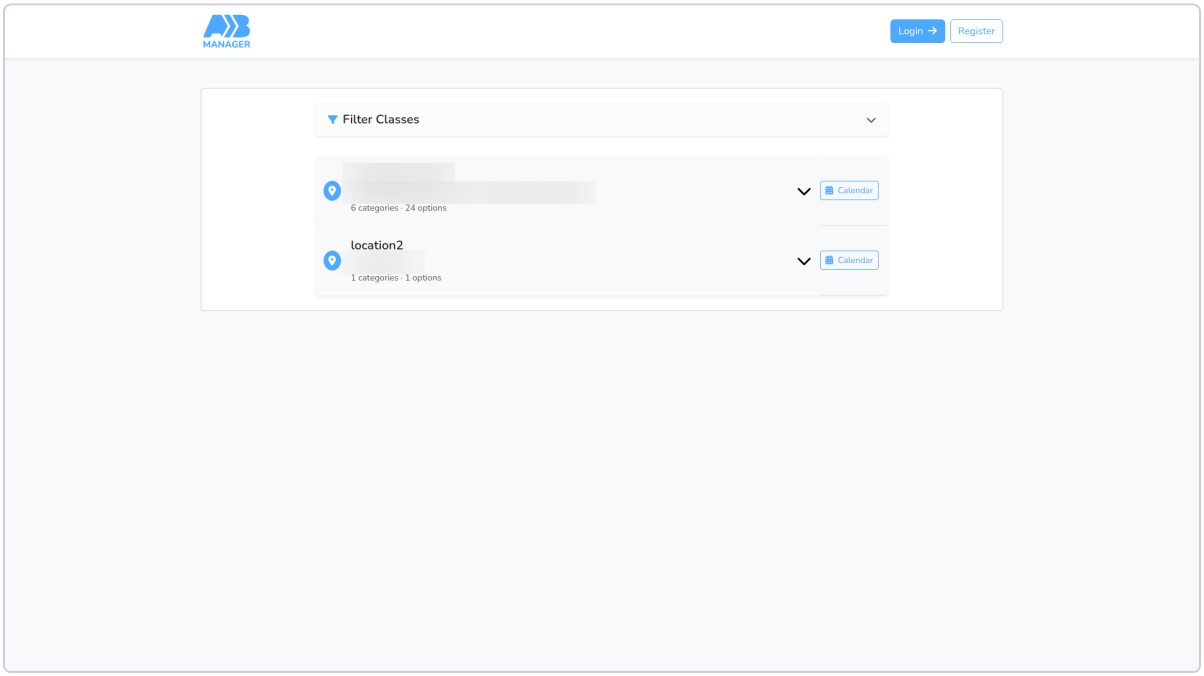

Good to know

- Your normal booking link, with no category or location, still shows every class at every venue, as before.
- The **Calendar** button keeps the same filter on a category link as well as on a location link.
- If a category has nothing open for booking, parents see **No classes available right now.**
- Parents book in the usual way from a filtered page: they open a class and press **Book Now**.
- Renaming a category doesn’t change its link, so links you’ve already shared keep working.

- The copied link is your club’s normal booking address with the category or location added to the end, for example `https://app.a2bmanager.com/club/your-club?categoryid=123`.

> **Tip:** Copy a link for each category you advertise, and use it on the matching page or button on your website, so parents land straight on the right classes.
